

# Team Project: Peer Evaluation

For this assignment, your group work will be graded in two methods. First you will be scored by your group's performance on the assignment as a whole. That will be 70% of your project grade. Secondly, you will be graded as an individual within your group which will be 30% of your project grade. The chart I have given you asks you to rate each group member for the amount of work s/he has done on the assignment (the total amount should be 100%), give comments and examples of each member's achievement. This assignment report sheet will be graded by the teacher so do a good job. For the grade section, use the following scale and mark the appropriate symbol.

## Basic Scoring Guidelines

### Team Member

**W**= This team member contributed many good ideas to the group, acted respectfully to all group members, stayed on task, and did **more than his/her share of the work**. **Only one person can get this grade!**

**T**= This team member contributed some good ideas to the group, acted respectfully to all group members, always stayed on task, and did his/her share of the work.

☉ = This team member contributed some good ideas to the group, acted respectfully to all group members, almost always stayed on task, and did his/her share of the work.

**R**= This person may have occasionally goofed around a little or acted a little bit disrespectfully, but did most of his/her share of the work and contributed to the overall product.

**M**= This person did not contribute to the group OR he/she negatively affected other people in the group with his/her behavior.

**H**= This person did not contribute to the group and negatively affected other people in the group with his/her behavior.

**Note: Remember you may not have more than one W nor more than two T's (and not both). This also assumes somebody did less than their share of the work!**
